## What Is a Continent?

A continent is a massive piece of land that is often separated from other areas of land by water or another feature, such as mountains.

Planet Earth has seven continents. Do you know the names of any of them?

A world map with the seven continents highlighted in different colors: North America (orange), South America (blue), Europe (purple), Africa (orange), Asia (blue), Australia (orange), and Antarctica (purple). The map is set against a background of a blue sky with white clouds.
